

Dear Patient,

It is recommended that all girls ages 9-26 years receive Gardasil, the vaccine designed to reduce the incidence of cervical cancer and other diseases caused by Human Papillomavirus.

Potomac Pediatrics is able to offer this vaccine, a 3-part series similar to the Hepatitis B vaccine series. However, at this time, insurance carriers are not covering the vaccine. The cost is \$150.00/dose, or \$450.00 total for the 3 necessary vaccinations.

Sincerely,

Potomac Pediatrics
